REVIEW ARTICLES

- Should Cesarean Scar Defect Be Treated Laparoscopically? A Case Report and Review of the Literature** 1145
Murat Api, MD, PhD, Aysen Boza, MD, Husnu Gorgen, MD, and Olus Api, MD
- Treatment of Women With an Endometrial Polyp and Heavy Menstrual Bleeding: A Levonorgestrel-Releasing Intrauterine Device or Hysteroscopic Polypectomy?** 1153
Myrthe M. van Dijk, MD, Nehalennia van Hanegem, MD, Maria E. de Lange, and Anne Timmermans, MD, PhD
- Lesions of the Broad Ligament: A Review** 1163
Debra S. Heller, MD

ORIGINAL ARTICLES

- One-Year Follow-Up Results of a Multicenter, Single-Arm, Objective Performance Criteria-Controlled International Clinical Study of the Safety and Efficacy of the Minerva Endometrial Ablation System** 1169
Philippe Laberge, MD, FRCSC, ACGE, Jose Garza-Leal, MD, Claude Fortin, MD, FRCSC, Robert Sabbah, MD, FRCSC, Tamas Fulop, MD, Norbert Pásztor, MD, and György Bacsó, MD
One-Year follow-up results of the Minerva Endometrial Ablation demonstrate that the system/procedure is safe, with efficacy being statistically significantly superior when compared to an Objective Performance Criteria control.
- Hysteroscopic Resection in Fertility-Sparing Surgery for Atypical Hyperplasia and Endometrial Cancer: Safety and Efficacy** 1178
Patrizia De Marzi, MD, Alice Bergamini, MD, Stefania Luchini, MD, Micaela Petrone, MD, Gian Luca Taccagni, MD, Giorgia Mangili, MD, Gabriella Colombo, MD, and Massimo Candiani, MD
Hysteroscopic resection of hyperplastic/cancer areas followed by high dosage progestin therapy is a safe and effective approach in the management of ACH and early EC patients wishing to preserve fertility.
- Flexible Carbon Dioxide Laser Fiber Versus Ultrasonic Scalpel in Robot-Assisted Laparoscopic Myomectomy** 1183
Souzana Choussein, MD, Serene S. Srouji, MD, Leslie V. Farland, MSc, and Antonio R. Gargiulo, MD
In robot-assisted laparoscopic myomectomy, the flexible CO₂ laser fiber is a safe alternative to the ultrasonic scalpel and allows the full range of motion of twisted robotic instruments.
- Timing for a Laparoscopic Myomectomy During the Menstrual Cycle** 1191
Jun Hyeok Kang, MD, Woo Young Kim, MD, Kyo Won Lee, MD, PhD, Kye Hyun Kim, MD, PhD, and Taejong Song, MD, PhD
We evaluated whether the different phases (follicular phase, luteal phase, or menstruation) of the menstrual cycle could affect the operative blood loss at the time of a laparoscopic myomectomy.

Table of Contents: November/December 2015 • Volume 22 Number 7 (continued)

- Hysteroscopic Myomectomy of Large Submucous Myomas in a 1-Step Procedure Using Multiple Slicing Sessions Technique** 1196
Mohamed Zayed, MD, PhD, Usama M. Fouda, MD, PhD,
Shereef M. Zayed, MD, Khaled A. Elsetohy, MD, PhD, and
Ahmed T. Hashem, MD, PhD
Our technique of hysteroscopic myomectomy (manual massage and hydromassage) is a safe and effective management for submucous myomas up to 6 cm in diameter.
- Combined Endometrial Ablation and Levonorgestrel Intrauterine System Use in Women With Dysmenorrhea and Heavy Menstrual Bleeding: Novel Approach for Challenging Cases** 1203
Efsthathios P. Papadakis, MD, Sherif A. El-Nashar, MBBCh,
Shannon K. Laughlin-Tommaso, MD, MPH, Sherif A. M. Shazly, MBBCh,
Matthew R. Hopkins, MD, Daniel M. Breitkopf, MD, and
Abimbola O. Famuyide, MBBS
In women with heavy menstrual bleeding and dysmenorrhea, levonorgestrel intrauterine system following endometrial ablation was feasible and can provide additional benefit to endometrial ablation alone.
- Change in Pain and Quality of Life Among Women Enrolled in a Trial Examining the Use of Narrow Band Imaging During Laparoscopic Surgery for Suspected Endometriosis** 1208
Lisa Gallicchio, PhD, Kathy J. Helzlsouer, MD, MHS,
Kevin M. Audlin, MD, Charles Miller, MD, Ryan MacDonald, PhD,
Mary Johnston, RNFA, BSN, CNOR, and Fermin F. Barrueto, MD
Improvements in pain and QOL are similar among patients with endometriosis undergoing surgery with narrow band imaging and white light compared to white light alone.
- Structured Hysteroscopic Evaluation of Endometrium in Women With Postmenopausal Bleeding** 1215
Margit Dueholm, MD, Ina Marie D. Hjorth, BS, Peter Secher, MD,
Annemette Jørgensen, MD, and Gitte Ørtoft, MD
Structured hysteroscopic evaluation of visual endometrial pattern terms increase diagnostic accuracy of hysteroscopy for diagnosis of malignancy in women with postmenopausal bleeding.
- Endometrial Ablation in Women With Abnormal Uterine Bleeding Related to Ovulatory Dysfunction: A Cohort Study** 1225
Alexis N. Hokenstad, MD, Sherif A. El-Nashar, MBBCh,
Zaraq Khan, MBBS, Matthew R. Hopkins, MD, and
Abimbola O. Famuyide, MBBS
Endometrial ablation is an effective and safe treatment for abnormal uterine bleeding related to ovulatory dysfunction.
- Hand-Assisted Laparoscopic Hysterectomy for Large Uteri** 1231
Teresa M. Walsh, MD, Haleh Sangi-Haghpeykar, PhD, Vicky Ng, MD,
Robert Zurawin, MD, and Xiaoming Guan, MD, PhD
Hand-assist laparoscopic hysterectomy for large uteri had similar low rates of complications as compared to open hysterectomy, with shorter hospital stays but longer operative time.

Table of Contents: November/December 2015 • Volume 22 Number 7 (continued)

- Removal of Endometrial Polyps: Hysteroscopic Morcellation versus Bipolar Resectoscopy, A Randomized Trial** 1237
Tjalina W. O. Hamerlynck, MD, Benedictus C. Schoot, MD, PhD, Huib A. A. M. van Vliet, MD, PhD, and Steven Weyers, MD, PhD
Hysteroscopic morcellation is a fast, effective and safe alternative to bipolar resectoscopy for removal of endometrial polyps in day surgery.
- Vaginal Uterine Morcellation Within a Specimen Containment System: A Study of Bag Integrity** 1244
Eugenio Solima, MD, Giuseppe Scagnelli, MD, Veronica Austoni, MD, Andrea Natale, MD, Carlo Bertulesi, MD, Mauro Busacca, MD, and Michele Vignali, MD
We have evaluated the integrity of endoscopic bag after transvaginal in-bag morcellation of uteri requiring vaginal morcellation to be removed during total laparoscopic hysterectomy.
- Exposure of Surgeons to Magnetic Fields during Laparoscopic and Robotic Gynecologic Surgeries** 1247
Jee Soo Park, BS, Jai Won Chung, BS, Soo Beom Choi, MS, Deok Won Kim, PhD, Young Tae Kim, MD, PhD, Sang Wun Kim, MD, PhD, Eun Ji Nam, MD, PhD, and Hee Young Cho, MD
This is the first study to measure and report on levels of exposure to extremely low-frequency magnetic fields to surgeons during laparoscopic and robotic gynecologic surgeries.
- Comprehensive Assessment of the Impact of Laparoscopic Ovarian Cystectomy on Ovarian Reserve** 1252
Yan Ding, MD, Ying Yuan, MD, Jingxin Ding, MD, PhD, Yisong Chen, MD, PhD, Xuyin Zhang, MD, PhD, and Keqin Hua, MD, PhD
Although acute damage to the ovarian reserve was evident in the first postoperative month following laparoscopic ovarian cystectomy of endometrioma, it had recovered by the sixth postoperative month.
- Effect of Intraperitoneal Bupivacaine on Postoperative Pain in the Gynecologic Oncology Patient** 1260
Colleen Rivard, MD, Rachel Isaksson Vogel, MS, and Deanna Teoh, MD
The use of an intraperitoneal local anesthetic was associated with improved pain control in patients undergoing laparoscopic surgery with a gynecologic oncologist.
- Routine Monitoring of Liver, Renal, and Hematologic Tests After Single- or Double-Dose Methotrexate Treatment for Ectopic Pregnancies After In Vitro Fertilization** 1266
Nigel Pereira, MD, Jennifer L. Bender, BS, Kolbe Hancock, MD, Jovana P. Lekovich, MD, Rony T. Elias, MD, Isaac Kligman, MD, and Zev Rosenwaks, MD
Our findings suggest that repeating liver/renal function tests or a complete blood count on day 7 after single or double dose methotrexate treatment for ectopic pregnancies may not be necessary in patients with normal baseline testing on day 1.

Table of Contents: November/December 2015 • Volume 22 Number 7 (continued)

Validation of the VBLaST: A Virtual Peg Transfer Task in Gynecologic Surgeons Christopher Awtrey, MD, Amine Chellali, PhD, Steven Schwaitzberg, MD, Suvranu De, ScD, Daniel Jones, MD, and Caroline Cao, PhD <i>A virtual reality peg transfer task, (VBLaST) was validated in gynecologic surgeons and trainees.</i>	1271
Laparoscopic Hysterectomy and Urinary Tract Injury: Experience in a Health Maintenance Organization Jasmine Tan-Kim, MD, Shawn A. Meneff, MD, Caryl S. Reinsch, MD, Cristina H. O'Day, MD, Judith Bebhuk, ScD, John S. Kennedy, MD, and Emily L. Whitcomb, MD <i>Urinary tract injury occurred in 1.3% of laparoscopic hysterectomies, with ureteral injuries being almost as common as bladder injuries.</i>	1278
INSTRUMENTS AND TECHNIQUES	
Robotic Shaving Technique in 25 Patients Affected by Deep Infiltrating Endometriosis of the Rectovaginal Space Antonio Pellegrino, MD, Gianluca Raffaello Damiani, MD, Claudia Trio, MD, Paolo Faccioli, MD, Paolo Croce, MD, Fulvio Tagliabue, MD, and Emanuele Dainese, MD <i>Removal of endometriotic nodules with rectal shaving by robotic approach.</i>	1287
Low Pain Score After Total Laparoscopic Hysterectomy and Same-Day Discharge Within Less Than 5 Hours: Results of a Prospective Observational Study Olivier Donnez, MD, PhD, Jacques Donnez, MD, PhD, Marie-Madeleine Dolmans, MD, PhD, Alice Dethy, MD, Marie Baeyens, MD, and John Mitchell, MD <i>Laparoscopic hysterectomy with same-day discharge is feasible, with low levels of pain and hospital stay of less than 5 hours.</i>	1293
CASE REPORTS	
Accessory Cavitated Uterine Mass: A Rare Cause of Severe Dysmenorrhea in Young Women P. G. Paul, MBBS, DGO, Gaurav Chopade, MBBS, MS, DNB, Tanuka Das, MBBS, MS, DNB, N. Dhivya, MBBS, MS, Saurabh Patil, MBBS, MS, and Manju Thomas, MBBS, MS <i>Describing three case reports of rare Mullerian anomaly called accessory cavitated uterine mass (ACUM) seen in young women less than 30 yrs of age presenting with severe dysmenorrhea.</i>	1300
Indocyanine Green Fluorescence Imaging in the Surgical Management of an Iatrogenic Lymphatic Fistula: Description of a Surgical Technique Andrea Papadia, MD, PhD, Sara Imboden, MD, Stefan Mohr, MD, Susanne Lanz, MD, Konstantinos Nirgianakis, MD, and Michael D. Mueller, MD <i>A technique of Indocyanine Green Fluorescence imaging guided laparoscopic management of a iatrogenic lymphatic fistula not responding to conservative treatment is presented.</i>	1304

Table of Contents: November/December 2015 • Volume 22 Number 7 (continued)

Acute Colonic Pseudo-Obstruction (Ogilvie's Syndrome) Following Total Laparoscopic Hysterectomy 1307

Monique Cebola, BMED, FRANZCOG,
Eliza Eddy, BSci(Med), MBBS, MRANZCOG, Suzanne Davis, MBBS, and
Laura Chin-Lenn, MBBS, FRACS

This case report describes Acute Colonic Pseudo-Obstruction (Ogilvie's Syndrome) following total laparoscopic hysterectomy, and a brief discussion in light of current literature.

A Case of Extragenital Teratoma in the Pouch of Douglas and Literature Review 1311

Mamoru Kakuda, MD, Shinya Matsuzaki, PhD, MD, Eiji Kobayashi, MD,
Kiyoshi Yoshino, PhD, MD, Eiichi Morii, PhD, MD, and
Tadashi Kimura, PhD, MD

A rare case of extragenital teratoma in the pouch of Douglas that appeared to be a parasitic dermoid cyst, and a literature review on the parasitic cyst located in the pouch of Douglas.
